Introduction

The food and beverage industry covers the full spectrum from production to retail, driven by growing global populations and rising incomes. Key trends include a shift toward healthier, organic products and increased focus on sustainability, with many companies adopting eco-friendly practices. Technological advancements, such as automation and e-commerce, are reshaping the sector.

Challenges like supply chain disruptions and intense competition persist, but opportunities remain in product innovation and expanding into new markets. Embracing digital sales channels further enhances growth potential. Overall, the industry is evolving rapidly with substantial prospects for adaptation and success.

Objectives

The Objective of this Power BI project is to analyze survey responses from the food and beverage industry to gain insights into consumer behavior, preferences, and perceptions.

The analysis will help identify key trends, understand brand perception, and explore potential areas for improvement in product offerings and marketing strategies.

Project Overview

This Power BI project focuses on analyzing survey responses from the food and beverage industry to gain insights into consumer behavior, preferences, and brand perceptions. By examining data across different demographics, the project aims to identify key trends, understand consumer attitudes, and pinpoint areas for improvement in products and marketing strategies.

The findings will provide actionable recommendations for refining product offerings and marketing approaches. This will enable businesses to better align their strategies with consumer expectations, enhance market positioning, and drive growth in the competitive food and beverage sector.

Data Overview

Dimension Table: dim_respondent

- Respondent_ID: Unique identifier for each respondent.
- Name: Name of the respondent.
- Age: Age of the respondent.
- Gender: Gender of the respondent.
- City_ID: Identifier linking the respondent to a city

Dimension Table: dim_cities

- City_ID: Unique identifier for each city.
- City: Name of the city.
- Tier: Tier classification of the city (e.g., Tier 1, Tier 2).

Fact Table: fact_survey_responses

- Response_ID: Unique identifier for each survey response.
- Respondent_ID: Unique identifier for each respondent.
- Consume_frequency: Frequency of consumption of food and beverage products.
- Consume_time: Typical time when the products are consumed.
- Consume_reason: Reasons for consuming the products.
- Heard_before: Whether the respondent has heard of the product before.
- Brand_perception: Respondent's perception of the brand.
- General_perception: Overall perception of the food and beverage industry.
- Taste_experience: Respondent's experience with the taste of the product.
- Reasons_preventing_trying: Reasons preventing respondents from trying the product..

Data Overview

- Current_brands: Brands currently consumed by the respondent.
- Reasons_for_choosing_brands: Reasons for choosing specific brands.
- Improvements_desired: Improvements desired in products.
- Ingredients_expected: Expected ingredients in products.
- Health_concerns: Health concerns related to products.
- Interest_in_natural_or_organic: Interest in natural or organic products.
- Marketing_channels: Preferred marketing channels for product information.
- Packaging_preference: Preferences for product packaging
- Limited_edition_packaging: Interest in limited edition packaging.
- Price_range: Preferred price range for products.
- Purchase_location: Typical locations where products are purchased.
- Typical_consumption_situations: Common situations in which products are

Conclusion

The analysis of survey data from the food and beverage industry has provided valuable insights into consumer behavior, preferences, and brand perceptions. By identifying key trends and understanding consumer attitudes, the project has highlighted areas where product offerings and marketing strategies can be enhanced. The actionable recommendations derived from this analysis will help businesses align more closely with consumer needs, optimize their market strategies, and improve overall customer satisfaction. Ultimately, this project equips industry stakeholders with the knowledge to make informed decisions, drive strategic improvements, and strengthen their competitive position in the market.
